CCTV Surveillance

ABOUT COMPANY

SafeHands is a full service system integrator specializing in Access Control, Life Safety, Fire System, CCTV, Mass Notification System, Security Fencing, Electronic Doors, Alarm Monitoring and Security Gates.

We design, install and maintain customized security systems that integrate physical security devices, electronic technology and information (IT) systems with operational systems such as building automation and human resources. This convergent approach streamlines management and increases capabilities. As an independent system integrator, we remain vendor-neutral and clearly focused on providing the right solution for each client, whether they need a complete turnkey solution, technical services or consulting services.

Let us help safeguard your personal and professional assets with the latest and most reliable security solution's technology available. You need a company that can make quick decisions and has a can-do attitude. When it comes to minimize your company's risk and maximizing your budget.

OUR MISSION

We serve our valued clients by ensuring the safety and security of their people, property and information.

OUR VISION

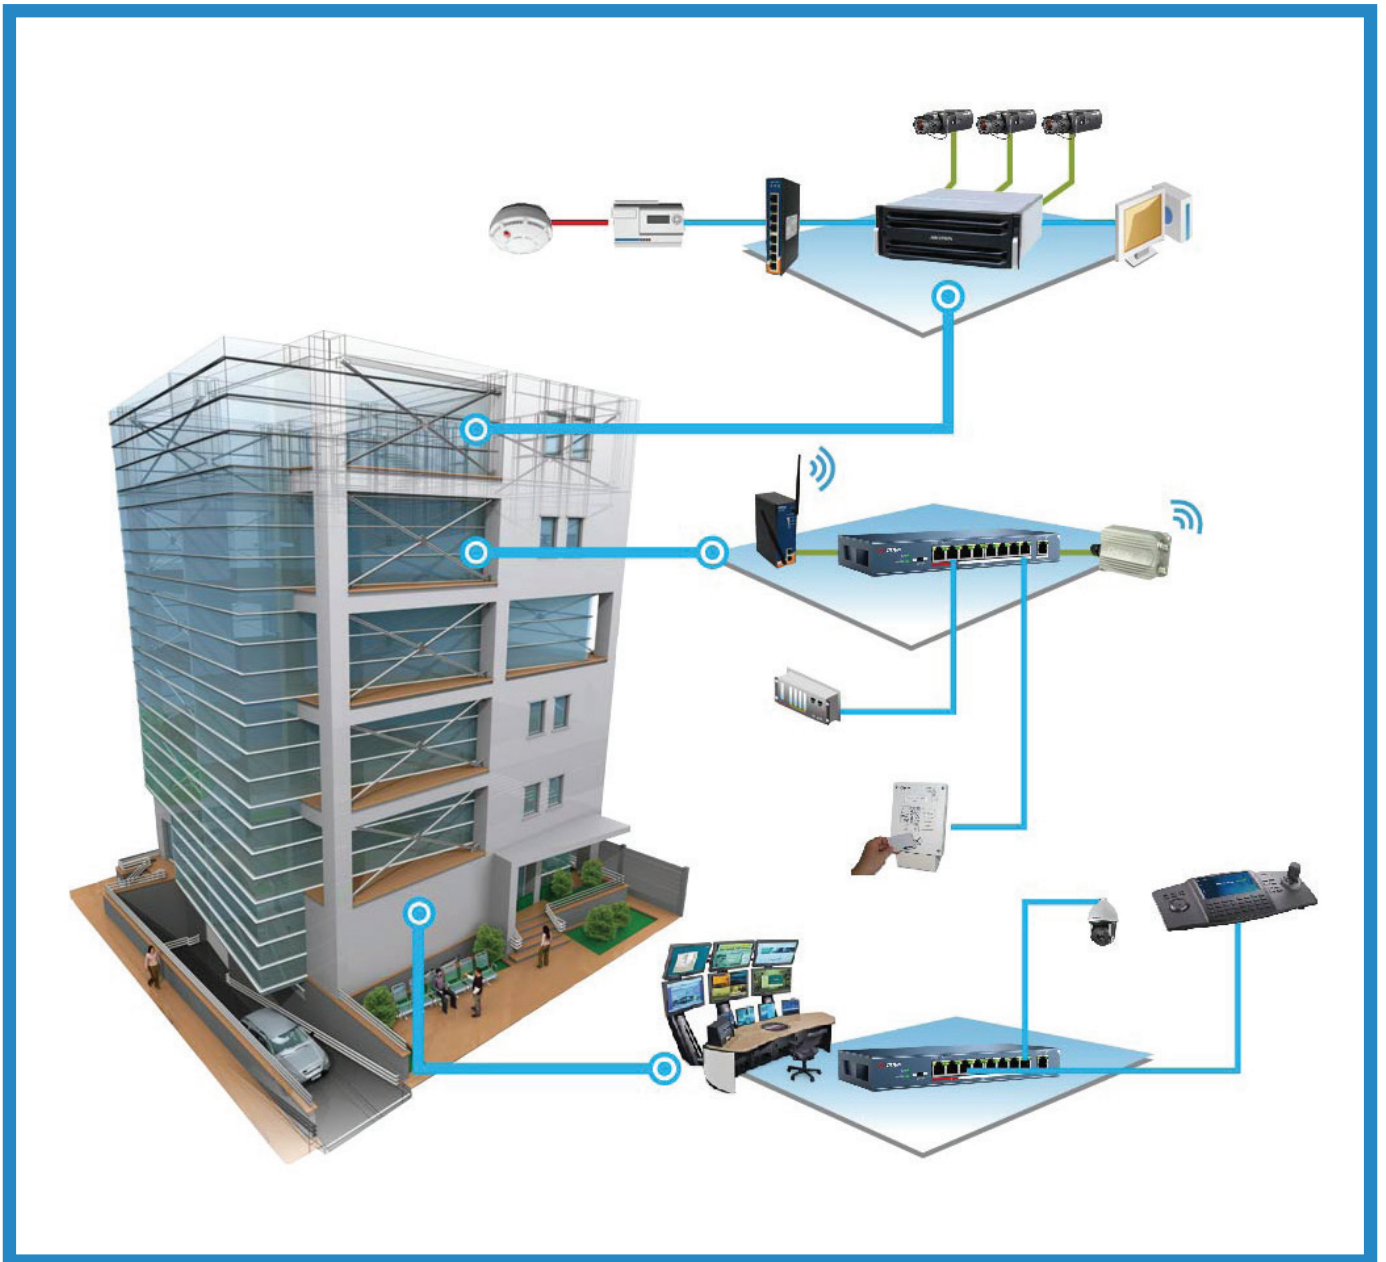

We delivers exceptional security through dedication to quality and service and protects our customers and their assets as they are our own.

OUR GOALS

Our goal is to built trust of our clients by delivering best in class security service with professionalism and consistency.

WE BELIEVE IN KEEPING YOU SAFE

CEO STATEMENT

IN ORDER TO SUCCEED, WE MUST FRIST BELIEVE THAT WE CAN, AND IN BUSINESS THE SUCCESS COMBINATION IS: DO WHAT YOU DO BETTER...AND: DO MORE WHAT YOU DO.

ABID ABBAS

CEO

As a CEO of SafeHands, I would like to personally extend an invitation to do business with us because we are a customer caring company. We have been constantly striving to provide our customers service of excellence. We look forward to make our customers more successful.

I myself have been keenly involved in every facet of the company and proudly announced that we are rich in employee talent and passion which make us dynamic and growing company, continues to thrive in the most challenging environment. We are operating our business in accordance with the highest standards, ethical conduct and meeting our client's need by providing value driven quality services through trained and knowledgeable personals.

CALL CENTER

A call centre is a centralized office used for receiving or transmitting a large volume of requests by telephone (usually) both inbound and outbound calls. Some firms, however, specialize only in calls that are inbound (for assistance, help, or ordering) or outbound (for sales promotion or other messages). Most telephone orders are handled by call centers and not by the manufacturers or suppliers of goods or services.

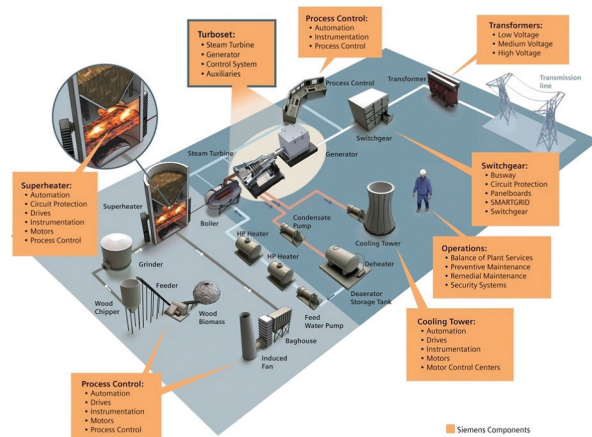

WEB DEVELOPMENT

Safehands also provides the service of web development as it has a team of enthusiastic and hard working members that can develop the outstanding and worth visiting website according to the need and desires of the client at an affordable price without compromising on quality. A good quality website can better grasp the attention of the others and can be very favorable to increase the number of clients.

Industrial Automation

Automation or automatic control, is the use of various control systems for operating equipment such as machinery, processes in factories, boilers and heat treating ovens, switching on telephone networks, steering and stabilization of ships, aircraft and other applications and vehicles with minimal or reduced human intervention. Some processes have been completely automated.

“ Alone we can do little, together we can do much. ”

OUR SERVICES

SafeHands provide a comprehensive blend of services within the industry of security. We aim to deliver specific, client-led solutions through accessing knowledge and expertise from high calibre security professionals and commercial managers.

CCTV, VIDEO SURVEILLANCE CAMERAS

Safehands has been providing CCTV surveillance which includes observation from a distance by means of electronic equipment or interception of electronically transmitted information. CCTV systems may operate continuously or only as required to monitor a particular event.

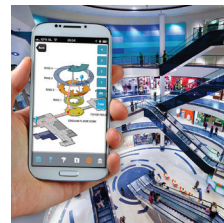

FIRE ALARM SYSTEMS & LIFE SAFETY

Safehands provides Fire detection system, Fire extinguishers, Fire alarm system, Fire Balls, Smoke Detectors and Life safety system. This is very beneficial to reduce the impact of uncontrolled fire and can save lives and property.

ELECTRONIC DOOR SYSTEMS

Safehands provides entrance safety control system which includes Electronic door system. These electronic doors are specially manufactured for the purpose of safety and security of our beloved clients.

TRACKING SYSTEM

Safehands also provides tracking system to its valuable clients because it is becoming an important tool for the businesses. The system enables the business to run smoothly and effectively.

SECURITY GUARD & GUARD PATROLLING SYSTEM

Safehands has also been dealing in providing security guards. A security guard is someone who patrols and inspects property against fire, theft, vandalism, terrorism, and illegal activity. They monitor people and buildings in an effort to prevent crime.

OUR EXPERTISE

SafeHands specialises in seamlessly converging multiple security technologies and manufacturers into total physical security solutions of any size, from smaller, single enterprise clients to city-wide deployments with many servers and thousands of cameras. Our certified technicians have extensive experience in both analog and IP-based platforms, wired and wireless networking, alternative power sources and proven security design principals, making SafeHands uniquely qualified to design, build and maintain real-world working solutions that solve the unique challenges faced by each of our customers.

ACCESS CONTROL

BARBED WIRE FENCING

NETWORKING & PBX SYSTEM

GUARD PETROLING

SOLAR PANEL SYSTEM

Safehands has been providing Access control which is now a day an important security technique physically and logically, that can be used to regulate who or what can view or use resources in a computing environment.

Safehands provides Barbed wire or Fencing to keep security measures complete. It is not only provided according to the needs of the clients but also completely installed keeping in mind the maximum satisfaction of the client.

Safehands has also been providing a complete solution of networking and PBX system as the needs be. This feature increases the efficiency and effectiveness of businesses to have a strong network within their premises and they can better work in coordination.

Safehands can also provide the services of Guard Patrolling which includes simple monitoring by walking or going around or it can be monitoring along with portable sensors both for the purpose of reconnaissance, security or combat.

Safehands provides the Solar panel system to combat the issue of power shortage. As the solar power can not only be better utilized as an alternative resource but this system is also environment friendly.

HISTORY OF OUR COMPANY

Safehands was established in 2012 in Karachi metropolitan of Pakistan to fulfil the need of latest security surveillance technologies and other Network services in order to cope up the existing and future challenges of security particularly in the wake of the prevailing law and order situation in Pakistan. Since then it has been flourishing through providing a complete range of network and security surveillance solutions.

WHAT CLIENTS SAY ABOUT OUR COMPANY

JILANI HOSPITAL:

We are very well satisfied with the services of Safehands.

AB ENGINEERING:

Fantastic products, easy installations and professional technical supports.

CASE STUDY & PARTNER

Unlike others, we do not only sell the products but we also seek to gain an understanding of what our clients need and find most appropriate products and solutions, best suited to our clients. We work for our clients as consultant and take away their hassles of finding the right product for them. We have installed more than 300 CCTV cameras in different cities of Pakistan.

01. CHALLENGE

Security and safety challenges rank among the most pressing issues of modern times. In the current, interconnected world, security challenges are becoming increasingly complex, new safety and security challenges arise and impact local, national, regional and international levels, which dramatically increases their complexity and scale. As such, solutions to contemporary security challenges require a wide array of actors operating on multiple levels of governance.

02. SOLUTION

We provide scalable and intelligent monitoring solutions that incorporate high-resolution CCTV cameras for enhanced image quality at low bandwidth, optimized storage, coupled with intelligent digital recording and analysis. We offer these solutions with best cameras over fibre optic, LAN, wireless and other technologies based on the requirement and existing infrastructure availability, along with options of remote monitoring and recording.

03. THE RESULT

The integrated Security Systems installed deliver enhanced performance, superior user experience and lower life cycle costs over time. Adoption of holistic approach supports efficiency gain-integration of Security Management throughout the site allows for extremely easy and efficient operation and maintenance of all systems, accessible through the user-friendly user interface.
